## **Studio Andrea Rocca - Collaboration request**

cvs@studioandrearocca.it  
3409691992

We are looking for a young designer who wants to get involved in a new and growing structure, the figure we are looking for must have a fair amount of autonomy in the development of a preliminary project, in its representation and presentation. We consider a plus the ability to perform metric surveys and the realization of photo realistic interior and exterior renderings. The work will be carried out at the headquarters of Monteforte d'Alpone or in smart working mode.

Required skills:

Creation and elaboration of architectural projects  
Excellent knowledge of Autocad  
Adaptability, flexibility and proactivity

## **COMPETITION**

### **The value of water - World Water Day Photo Contest 2021**

Photo Contest - 5th edition

<https://www.professionearchitetto.it/concorsi/notizie/28076/Il-valore-dell-acqua-World-Water-Day-Photo-Contest-2021>

<https://worldwaterday.it/it/>

Delivery by February 18, 2021

Published the rules of the fifth edition of the "World Water Day Photo Contest" promoted by Lions Club Seregno Aid to raise awareness of the critical issue of water in our era, with a focus on access to good water.

All photographs highlighting the value of water, taken with any type of device - camera, smartphone, tablet, drone - are accepted.

The contest, which features the collaboration of UN Water (the body that coordinates the work of the United Nations on water and sanitation), Lions Water for Life MD108, Lions Clubs, and the patronage of the City of Seregno, is open to all photography enthusiasts and supporters of environmental issues.

*For info about prizes and organization check the site.*

## **Rethinking barrier-free condominium hallways**

ideas competition

<https://www.professionearchitetto.it/concorsi/notizie/28263/Ripensare-gli-androni-di-condominio-senza-barriere>

[condominiosolutionseventi.it](http://condominiosolutionseventi.it)

Due May 31, 2021

Condominio Solutions - in collaboration with LEDHA's Regional Center for Accessibility and Environmental Wellness - is organizing an ideas competition to rethink the functional organization, design and restyling of the access areas of condominium buildings and, especially, the lobbies.

The objective of the competition is the production of innovative, elegant and welcoming architectural and design proposals that clearly show choices aimed at environmental sustainability, sustainability of materials, durability, energy saving, ease of maintenance.

It will be essential to provide solutions suitable for people with disabilities or motor and sensory deficits, devising smooth and safe ways to overcome architectural and communication barriers, from access (thresholds, steps, handles) to the interior of the apartments (doormats, elevators, etc.) in accordance with the criteria of Universal Design.

Participants will be able to foresee case studies in historical houses designed by important architects of the twentieth century.

Participation in the competition is free of charge and is addressed to:

- students enrolled in the last two years of the faculties of architecture and design or young graduates after 2016.
- junior and senior architects from any discipline
- designers from any sector

Prizes

In addition to awarding the first prize of 500 euros to the winner, the jury may award special mentions for deserving projects worthy of publication.

## **Competition - LEISURE HARBOR**

<https://www.youngarchitectscompetitions.com/competition/leisure-harbor#competition>

Whatever one's origins, few can deny having somehow experienced the intense fascination of the ports.

The sound of the siren and the pungent smell of saltiness in the foggy autumn nights, the roar of the wind and the roar of the waves in the tormented winter days: there are many nuances that characterize the marinas, but a constant note of mystery insists where the cities are immersed in the sea, a feeling of sweetness where the waves are tamed.

For centuries the ports have been more than a place, they have been the scene of adventures, a melting pot of cultures and oddities of all kinds; a place where memory became story, the story turned into legend, and the legend - often - turned into myth. In times forged by industry, by the space race and by the roar of the shuttle, ports appear probably outdated places, frequently

desolate or heavily industrialized: in any case cut off from a city of which they were the beating heart and cultural epicenter.

So what is the role of ports in the era of the web and the smartphone?

It is on this question that Leisure Harbor, the competition of BT and Marina di Loano wants to reflect to write the future of ports through the re-design of one of the ten most important marinas in Europe: an opportunity to rediscover the ports as a place of life, epicenter of the city overlooking the sea, privileged place of exchange, culture and meeting.

Today's world has certainly shifted its center of gravity: the great exploration is no longer traced by compasses or driven by sails inflated by the wind, yet today more than ever the world needs dreams. Today more than ever, the world needs beauty and a return to nature, and in this, ports cannot but represent an extraordinary opportunity. Ports are places of the soul before being nautical infrastructures; because ports are the starting and ending line of the most extraordinary adventures; because ports are - in the end - the most actual expression of that atavistic impulse towards the unknown, which roars and will always roar behind the rational composure of the contemporaneity of every time.

Yac thanks the designers who will accept this challenge.
